PROFESSIONAL SUMMARY

Senior Android Engineer and Android Developer with **7+ years** and **29+ production apps** (including Taleek, **10L+ downloads**), building native Android apps and mobile SDKs with **Kotlin**, Java and **Jetpack Compose**. Architected a **Kotlin Multiplatform (KMP)** and **Compose Multiplatform (CMP)** SDK shipped on Android and iOS, and built **PHI security** (encryption, NDK root detection), the GLP Screening flow and **WCAG 2.1** accessibility for a healthcare app with **1L+ active users**. Led a team of **5 engineers** in Agile/Scrum sprints, collaborating cross-functionally with product, design, QA and backend, and trained **50+ engineers** at Samsung R&D. Hands-on **AI-assisted software engineer**: contributed to an LLM-based AI developer agent; uses Cursor, Claude, Gemini and Copilot daily with human review.

TECHNICAL SKILLS

Languages: Kotlin, Java, XML, JavaScript, Groovy, C/C++ (Android NDK security)

Android: Android SDK, Jetpack Compose, Android Jetpack (ViewModel, Lifecycle, Room, Paging, Navigation, WorkManager, DataStore, Data Binding), Material 3, View system, Wearable UI

Multiplatform: Kotlin Multiplatform (KMP), Compose Multiplatform (CMP), expect/actual, Ktor, SQLDelight, Koin, Kotlin Serialization, shared UI, platform abstractions

Architecture: Clean Architecture, MVI, MVVM, MVP, UDF, Repository, SOLID, Multi-module, SDK/API Design

Async & DI: Kotlin Coroutines, Flow, StateFlow, SharedFlow, Hilt, Dagger 2, Koin

Networking & Data: Retrofit, REST APIs, Room, SQLite, Jetpack DataStore, Offline Sync, Swagger, AWS S3

Mobile Security: PHI protection, Firebase field encryption, encrypted storage, NDK root/emulator detection, secure S3

Integrations: Firebase Cloud Messaging (FCM), Google Maps, Razorpay, Stripe, Braintree, Google Pay, Twilio, ExoPlayer, Folio Reader SDK, Social Login, React Native bridges, reusable component libraries

Testing & Release: Unit Testing (JUnit, Mockito), Espresso, Compose UI Testing, CI/CD (GitHub Actions, GitLab CI), Gradle, Firebase Crashlytics, Firebase Analytics, Remote Config, Performance & Memory Optimization, Play Console, Android App Bundles (AAB), Play Store Publishing

Accessibility: WCAG 2.1, TalkBack, VoiceOver, Compose Semantics, focus order, dynamic font scaling

AI & LLM Tools: AI-Assisted Development, Generative AI, LLM-based developer agents, Prompt Engineering, MCP, Cursor, Claude, Claude Code, Gemini, GitHub Copilot, ChatGPT, Codex, human-in-the-loop review

Leadership & Process: Technical Leadership, Ownership, Team Lead, Mentoring, Stakeholder Management, Cross-functional Collaboration (Product, Design, QA, Backend), Roadmap Planning, Technical Design Documents, Design Reviews, Code Review Ownership, Agile, Scrum

Tools & Platform: Android Studio, Git, GitHub, Jira, Confluence, SonarQube, AOSP, Custom ROMs, Kernel

WORK EXPERIENCE

Senior Software Engineer (Android & Kotlin Multiplatform)

Sep 2024 – Aug 2026

Dario Health

Gurgaon, India

Dario Journey SDK: Kotlin Multiplatform + Compose Multiplatform (Android & iOS)

- Architected a **Kotlin Multiplatform (KMP) + Compose Multiplatform (CMP)** SDK for Android and iOS, sharing business logic, state management, networking and UI, built with **Ktor**, **SQLDelight** and **Koin**.
- Designed the SDK end to end: Kotlin **DSL configuration API**, core journey engine, **MVI** state layer, Compose renderers, shared design system and platform abstractions for media, analytics, image loading, deep links and authentication.
- Built the **Discover** feature module in Compose Multiplatform using MVI / unidirectional data flow (UDF), Kotlin Coroutines and Flow, shipped on Android and iOS from a single codebase.

Mobile Security (PHI)

- Protected patient health information (**PHI**) with **field-level Firebase encryption**, encrypted storage and secure S3 media.
- Wrote **root and emulator detection in C/C++ with the Android NDK** to block compromised devices.

Dario Health Android App (1L+ downloads & active users)

- Built the **GLP Screening flow (10+ screens)** for the GLP-1 program, multilingual onboarding and consent flows, and **re-architected the native Chat** feature.
- Modernized legacy code toward Kotlin, **Jetpack Compose**, **Clean Architecture** and modular features; architecture/design reviews, PR reviews, performance and stability work.
- Implemented **WCAG 2.1** accessibility: Compose Semantics, TalkBack, VoiceOver, focus order, touch targets and dynamic font scaling.

- Built native Android modules and bridges for **React Native** host apps.

AI-Assisted Software Engineering

- Contributed to an internal **LLM-based AI developer agent** that turns PRDs and codebase context into technical approaches, Confluence documentation and Jira tasks, reviewed by engineers (human-in-the-loop).
- Used **AI coding assistants** daily (Cursor, Claude, Claude Code, Gemini, GitHub Copilot) across the development workflow, with engineer review of all AI-generated code.

Engineer (Android)

Apr 2023 – Apr 2024

Samsung R&D Institute India

Noida, India

- Built a new Android module from scratch for a confidential enterprise app (Kotlin, **MVVM**), on sprint timelines.
- Led a team of **5 Android engineers** in **Agile/Scrum**: Jira tickets, task assignment and sprint execution.
- Trained **50+ engineers**, freshers to managers, on MVVM and Data Binding (migration from MVC).
- Developed **Galaxy Watch** Contacts and Emergency Contacts features, with wearable UI tuned for small screens.
- Code quality via code reviews and **SonarQube**; lifecycle handling and production debugging.

Android Developer

Feb 2019 – Mar 2023

Service-Based Companies

India

- Worked on **29+ Android projects** across healthcare, e-commerce, education, food delivery, agriculture, gaming and social, including Taleek (**10L+ downloads**, 7 languages) and apps for US clients.
- **Lead Android developer** on KOSO, Offleash'd, Subsational and Storywise (Pencils of Promise); enhancement, maintenance and UI design on other client apps.
- Built native Android apps in **Kotlin and Java** with MVVM, MVP, Retrofit, Room, Hilt, Coroutines/Flow, Jetpack DataStore and Data Binding; migrated Java to Kotlin; wrote specs and technical docs.
- Integrated **payment gateways** (Razorpay, Stripe, Braintree, Google Pay), social login, Firebase Cloud Messaging (FCM), Google Maps, Twilio live sessions and offline sync.
- Implemented ExoPlayer video playback and **R8/ProGuard**; owned features from client requirements to Play Store release, with Crashlytics for production support.

KEY PROJECTS

Dario Journey SDK | *Kotlin Multiplatform, Compose Multiplatform, Ktor, SQLDelight, Koin* Dario Health
Shared Android/iOS SDK: DSL configuration API, journey engine, MVI state layer and design system.

Mobile Security for Patient Data (PHI) | *Android NDK, C/C++, Firebase, Encryption, AWS S3* Dario Health
Field-level encryption, encrypted storage, secure S3 media and NDK root/emulator detection (1L+ users).

Taleek – Language Lessons | *ExoPlayer, Twilio, Razorpay, R8, ProGuard, MVVM* Google Play
Video lessons in 7 languages with **10L+ downloads**, live Twilio sessions and Razorpay subscriptions.

Subsational | *Java, MVP, Stripe, Braintree, Google Pay, Google Maps* Google Play
Lead developer and UI/UX on a US food-ordering app with three payment gateways and social login.

Kisan Kamdhenoo Marketplace (KKM) | *MVVM, FCM, Social Login, Swagger* Google Play
App development and UI design for a marketplace connecting farmers, traders, FPOs and cooperatives.

Offleash'd | *MVVM, FCM, Social Login, Android Jetpack* Google Play
Lead developer on the native Android app for a pet owners' social platform with push notifications.

Storywise – Pencils of Promise | *Room, Offline-First, Offline Sync* pencilsofpromise.org
Lead developer on an offline book-reading app for low-connectivity areas, with content stored locally in Room.

KOSO | *Kotlin, Retrofit, Hilt, Jetpack DataStore, Kotlin Flow, MVVM* Lead Developer
Led development of a spin-wheel rewards game app with Kotlin, Hilt, DataStore, Flow and Data Binding.

More client apps | *Folio Reader SDK, Telemedicine, QR Scanning, Social Login* Google Play
VJ Education (e-books), TelemedReferral (75+ specialties), DealZapp and iSave Business (QR deals).

Custom ROMs – Octavi OS, MIUI 9 Port & AOSP-JDC | *AOSP, Linux Kernel, Build Scripts* GitHub
Octavi OS (Zenfone Max Pro M1); MIUI 9 port and AOSP-JDC (Micromax A102) on XDA; kernel/framework patches.

android_code_library (open source) | *Room, Paging, NavigationUI, MVVM, MVP, MVC* GitHub
Android code book with notification types, Room, Paging, NavigationUI and architecture samples.

EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech), Computer Science & Engineering – 74% 2015 – 2019
Bhartiya Institute of Engineering & Technology, Rajasthan Technical University Sikar, Rajasthan

Android Development Using Kotlin – 90th percentile Sep 2026
TestGorilla Certification

AWARDS & ADDITIONAL INFORMATION

- **Star Performer of the Month** · **Employee of the Month** (Sep 2019) · **The Difference Builder** (Dec 2019)
- **10 LinkedIn recommendations** · **Languages:** English, Hindi, Bengali · Rubik's cube in 48 s
