PROFESSIONAL SUMMARY

Senior Android Engineer and Android Developer with **7+ years** building native Android apps and mobile SDKs with **Kotlin**, Java and **Jetpack Compose**. Architected a **Kotlin Multiplatform (KMP)** and **Compose Multiplatform (CMP)** SDK shipped on Android and iOS, and worked on a digital health app with **1L+ downloads and active users**, covering GLP-1 program features, app security and **WCAG 2.1** accessibility. Led a team of **5 engineers** in Agile/Scrum sprints and trained **50+ engineers** at Samsung R&D. Hands-on **AI-assisted software engineer**: contributed to an LLM-based AI developer agent; uses Cursor, Claude, Gemini and Copilot daily with human review.

TECHNICAL SKILLS

Languages: Kotlin, Java, XML

Android: Android SDK, Jetpack Compose, Android Jetpack (ViewModel, Room, Paging, Navigation, DataStore, Data Binding), Material Design, Wearable UI (Galaxy Watch)

Multiplatform: Kotlin Multiplatform (KMP), Compose Multiplatform (CMP), shared UI, platform abstractions

Architecture: Clean Architecture, MVI, MVVM, MVP, UDF, Modularization, SDK & API Design, Kotlin DSL

Async & DI: Kotlin Coroutines, Kotlin Flow, Hilt (Dependency Injection)

Networking & Data: Retrofit, REST APIs, Room, SQLite, Jetpack DataStore, Offline Sync, Swagger

Integrations: Firebase Cloud Messaging (FCM), Google Maps, Razorpay, Stripe, Braintree, Google Pay, Twilio, ExoPlayer, Folio Reader SDK, Social Login, React Native bridges

Accessibility: WCAG 2.1, TalkBack, VoiceOver, Compose Semantics, focus order, dynamic font scaling

AI & LLM Tools: AI-Assisted Development, Generative AI, LLM-based developer agents, AI coding assistants, Cursor, Claude, Gemini, GitHub Copilot, human-in-the-loop review

Leadership & Process: Technical Leadership, Team Lead, Mentoring, Agile, Scrum, Sprints, Code Review

Tools: Android Studio, Git, GitHub, GitLab, Jira, Confluence, SonarQube, R8/ProGuard

Platform: AOSP, Custom ROMs, Linux kernel patches, build scripts

WORK EXPERIENCE

Senior Software Engineer (Android & Kotlin Multiplatform)

Sep 2024 – Aug 2026

Dario Health

Digital Health

Kotlin Multiplatform SDK (Android & iOS)

- Architected a **Kotlin Multiplatform (KMP)** + **Compose Multiplatform (CMP)** SDK for Android and iOS, sharing business logic, state management, networking and UI across both platforms.
- Designed the SDK end to end: Kotlin **DSL configuration API**, core journey engine, **MVI** state layer, Compose renderers, shared design system and platform abstractions for media, analytics, image loading, deep links and authentication.
- Built the **Discover** feature module in Compose Multiplatform using MVI / unidirectional data flow (UDF), Kotlin Coroutines and Flow, shipped on Android and iOS from a single codebase.

Dario Health Android App (1L+ downloads & active users)

- Developed Android features for the **GLP-1 program** phase and other product areas of the flagship app.
- Worked on Android **app security** for the healthcare app.
- Modernized legacy code toward Kotlin, **Jetpack Compose**, **Clean Architecture** and modular features.
- Implemented **WCAG 2.1** accessibility: Compose Semantics, TalkBack, VoiceOver, focus order, touch targets and dynamic font scaling.
- Built native Android modules and bridges for **React Native** host apps.

AI-Assisted Software Engineering

- Contributed to an internal **LLM-based AI developer agent** that turns PRDs and codebase context into technical approaches, Confluence documentation and Jira tasks, with every output reviewed by engineers (human-in-the-loop).
- Used **AI coding assistants** daily (Cursor, Claude, Gemini, GitHub Copilot) across the development workflow, with engineer review of all AI-generated code.

Engineer (Android)

Samsung R&D Institute India

Apr 2023 – Apr 2024

Noida, India

- Built a new Android module from scratch for a confidential enterprise app using Kotlin, MVVM and Data Binding.
- Led a team of **5 Android engineers** in **Agile/Scrum**: Jira, sprint execution and task allocation.
- Trained **50+ engineers**, from freshers to managers, on MVVM architecture and Data Binding.
- Developed **Galaxy Watch** Contacts and Emergency Contacts features, with wearable UI and touch targets tuned for small screens.
- Maintained code quality through code reviews and **SonarQube** static analysis.

Android Developer

Service-Based Companies

Feb 2019 – Mar 2023

India

- Worked on **27+ Android projects** across healthcare, e-commerce, education, food delivery, agriculture, gaming and social, including Taleek (**10L+ downloads**) and apps for US clients.
- **Lead Android developer** on KOSO, Offleash'd, Subsational and Storywise (Pencils of Promise); enhancement, maintenance and UI design on other client apps.
- Built native Android apps in **Kotlin and Java** with MVVM, MVP, Retrofit, Room, Hilt, Coroutines/Flow, Jetpack DataStore and Data Binding.
- Integrated **payment gateways** (Razorpay, Stripe, Braintree, Google Pay), social login, Firebase Cloud Messaging (FCM), Google Maps, Twilio live sessions and offline sync.
- Implemented ExoPlayer video playback and **R8/ProGuard** code shrinking and obfuscation.
- Gathered client requirements and contributed UI/UX design on several apps.

KEY PROJECTS

Dario Health – Android App | *Kotlin, Jetpack Compose, Clean Architecture, WCAG 2.1* [Google Play](#)
Healthcare app (1L+ active users): GLP-1 program features, app security, accessibility and modernization.

Galaxy Watch Contacts | *Wearable UI, Galaxy Watch* [Samsung R&D](#)
Contacts and Emergency Contacts features on Galaxy Watch, with touch targets tuned for small screens.

Taleek – Language Lessons | *ExoPlayer, Twilio, Razorpay, R8, ProGuard, MVVM* [Google Play](#)
Video lessons in 6 languages with **10L+ downloads**, live Twilio sessions and Razorpay subscriptions.

Subsational | *Java, MVP, Stripe, Braintree, Google Pay, Google Maps* [Google Play](#)
Lead developer and UI/UX on a US food-ordering app with three payment gateways and social login.

Kisan Kamdhenoo Marketplace (KKM) | *MVVM, FCM, Social Login, Swagger* [Google Play](#)
App development and UI design for a marketplace connecting farmers, traders, FPOs and cooperatives.

Offleash'd | *MVVM, FCM, Social Login, Android Jetpack* [Google Play](#)
Lead developer on the native Android app for a pet owners' social platform with push notifications.

Storywise – Pencils of Promise | *Room, Offline-First, Offline Sync* [pencilsofpromise.org](#)
Lead developer on an offline book-reading app for low-connectivity areas, with content stored locally in Room.

KOSO | *Kotlin, Retrofit, Hilt, Jetpack DataStore, Kotlin Flow, MVVM* [Lead Developer](#)
Led development of a spin-wheel game app with Kotlin, Hilt, DataStore, Flow and Data Binding.

VJ Education | *Folio Reader SDK, Room, Material Design* [Google Play](#)
Feature development and maintenance for a competitive-exam preparation app, including e-book reading.

TelemedReferral | *Telemedicine, Audio & Video Calls* [Google Play](#)
Connects doctors with specialists across 75+ sub-specialty types for audio and video consultations.

DealZapp and iSave Business | *Social Login, QR Scanning, Maps, Material Design* [Retail & Deals](#)
Local deals apps: UI redesign and social login (DealZapp); QR-code discounts with map views (iSave).

Custom ROMs – MIUI 9 Port & AOSP-JDC | *AOSP, Linux Kernel, Build Scripts* [XDA Developers](#)
Ported MIUI 9 and built AOSP-JDC for the Micromax A102 (MT6572), with kernel patches and build scripts.

android_code_library (open source) | *Room, Paging, NavigationUI, MVVM, MVP, MVC* [GitHub](#)
Android code book with notification types, Room, Paging, NavigationUI and architecture samples.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering – 74%

Bhartiya Institute of Engineering & Technology, Rajasthan Technical University

2019

Sikar, Rajasthan

AWARDS & ADDITIONAL INFORMATION

- **Star Performer of the Month** and **Employee of the Month** (Sep 2019) at service-based companies.
- **Languages:** English, Hindi, Bengali · Rubik's cube in 48 seconds
